Career Objective

Business Central Developer with hands-on experience in AL development, delivering reliable ERP and warehouse solutions. Actively involved in enhancing business process customizations and supporting continuous system improvements

Experience

Business Central Developer

The Direction Pte. Ltd. (Remote, Singapore)

OCT 2023 - Present

- Developed and customized Business Central solutions using AL for Sales, Purchase, Inventory, and Warehouse modules.
- Built and implemented a custom warehouse interface using .NET and HTML, streamlining pick and purchase order processes in Business Central.
- Worked on warehouse/WMS customizations, including receipts, put-aways, picks, and shipments.
- Built and enhanced RDLC reports, including packing and label reports.
- Implemented WhatsApp and Autobot integrations with Business Central to automate RFO page generation, utilizing JSON data from external systems via WhatsApp messages and purchase orders received through email, PDF, and Excel, improving operational efficiency.
- Created and maintained API pages for integration with external systems.
- Guided clients and end-users on ERP and warehouse processes, explaining system behavior and providing functional support.
- Provided production support, analyzed issues, and delivered timely fixes.
- Collaborated with functional consultants and project teams to understand requirements and implement solutions effectively.
